

SIMPLIFY THE JOURNEY™ WITH A COMBINATION PRODUCT SOLUTION (CPS)

**Complex drug development. Regulatory scrutiny.
Changing standards. Combination products.**

Whether you are developing a biologic, pharmaceutical, or generic product, West understands the challenges you face along the drug development journey because we live it with you. And for more than 95 years, we've been developing and refining our expertise to help our partners move from molecule to market.

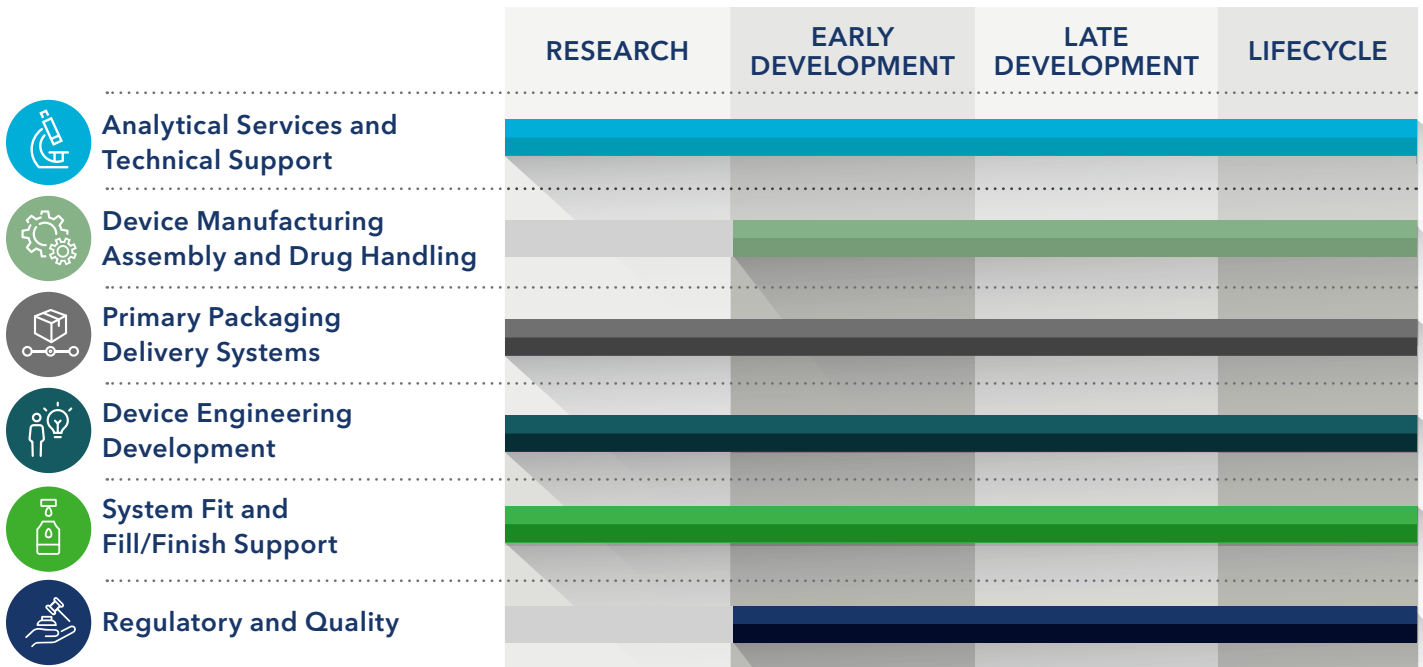

That's why we're introducing our CPS Solution Program - a comprehensive approach that combines West's high-quality packaging and delivery products with our expert analytical testing, fill-finish services, device assembly and manufacturing, and regulatory support. We offer solutions at any stage of development across all injectable formats.

Integrating products and services into one package with one partner can help you:

- Reduce development and supply risk
- Accelerate the path to market
- Minimize total cost of ownership
- Improve the patient experience

PARTNERING WITH CUSTOMERS AT EVERY STAGE OF DEVELOPMENT

Simplify the Journey™ with a combination product solution.

Disclaimer:

West's SmartDose® on-body delivery system is not independently cleared or approved by any Regulatory Body for general healthcare professional or patient use, nor is it available for general commercial purchase. Its distribution and use are subject to applicable regulatory requirements for clinical investigation, and for marketing authorization, as used in combination with a specific drug or biological product. Each component of a combination product is subject to the requirements established by the Regulatory Body for that component (drug, biologic or device). The regulatory process can be more complicated for combination products including an evaluation of the product characteristics, delivery system and its functionality, intended users and use environment(s), as well as the potential for undesirable interactions between the drug or biologic and the delivery system. As a result, we note that the SmartDose® on-body delivery system's compatibility with any particular drug or biologic must be confirmed, and its ability to achieve the desired patient benefits must also be confirmed, on a case-by-case basis in a manner sufficient to meet Regulatory Body requirements. Failure to follow product instructions for use may result in compromised sterility; contamination; leakage (including possible exposure to medication); and/or underdosing. Product misuse could potentially lead to needlestick injury, user and/or patient exposure to pathogens or infection, and/or suboptimal or delayed therapy. Products are shown for INFORMATION purposes only. Important product and safety information and warnings available at: <https://www.westpharma.com/products/self-injection-platforms/smartdose/10-large-volume-wearable-injector-device>.
